NoPests® Wasp Lure

- 1 Unlock the Wasp Dome trap (sold separately), pour in 250ml of NoPests Wasp Lure. Lock Wasp Dome lid to closed position.
- 2 Locate dome trap in direct sunlight in areas where wasps frequent, using hanging cord provided.
- 3 Replace lure every 2-4 weeks. If traps are placed in proximity to bee hives, the trap contents should be disposed of some distance from the bee hives to avoid bees being attracted to the discarded lure.

NoPests Wasp Lure repels bees when it is fresh and the volatile repellent components are highly active. These components disappear over time and become less active if the lure is diluted.

- 4 If the Dome Trap is full and there is no free liquid, remove contents and rinse with clean water before refilling with NoPests Wasp Lure.

TIP: Use in high summer months to control active German and Common wasp populations and also in winter to late spring to control queen wasps, preventing population growth.

FIRST AID: If medical advice is needed, have product label or container at hand. If swallowed do not induce vomiting. For advice contact the NATIONAL POISONS CENTRE 0800 POISON (0800 764 766) or a doctor. If splashed in eyes, remove contact lenses if present and easy to do, flush eyes with water for at least 15 minutes and see a doctor. If inhaled and breathing is difficult, move to fresh air and get medical advice. If on skin, wash with plenty of soap and water. If skin irritation or a rash appears get medical advice/attention.

CONDITIONS OF SUPPLY: Storage application and use of this product is beyond the control of the Distributor of this product. Key Industries Ltd will not accept any responsibility whether for consequential loss or otherwise in connection with supply and use of this product other than those responsibilities imposed to the sale and supply of these goods.
