

BIOCHARGE

BIOCHARGE Carbon Boost is a competitive, innovative New Zealand made biological brew that rebuilds structure, restores activity, and makes nutrition work harder on your land.

CARBON & BIOLOGY RESET IN EVERY BREW

**Fish
Hydrolysate**

A readily available organic Nitrogen source that feeds plant & soil biology.

**Bio-Char
Charged**

Nature's Carbon that quickly improves soil/root system efficiency.

**Seaweed
Tonic**

A natural resource providing additional micro-nutrients and boosting microbial activity.

Biologically complete brew containing 18 amino acids, humates, molasses and naturally occurring trace elements.
